

## SHIVANI KAMATKAR

Pune, India | kamatkarshivani@gmail.com | +91-9156807276

---

### PROFESSIONAL SUMMARY

Frontend Developer with **4 years of experience at HCL Technologies** in designing and developing **scalable, responsive, and user-centric web applications**. Skilled in **React.js, Angular, JavaScript, TypeScript, and UI/UX design**, with exposure to **REST APIs, backend frameworks (Spring Boot, Django, Flask), and relational databases (MySQL)**. Strong background in collaborating with designers, product owners, and backend engineers to deliver high-performance digital solutions for **USA-based clients**.

---

### CORE COMPETENCIES

- ✓ Frontend Development (React.js, Angular, JavaScript, TypeScript)
  - ✓ Responsive Web Design & Cross-Browser Compatibility
  - ✓ UI/UX Design – Wireframing, Prototyping (Figma)
  - ✓ REST API Integration & Data Handling
  - ✓ Agile/Scrum Project Delivery
  - ✓ Fullstack Exposure (Spring Boot, Django, Flask, MySQL)
  - ✓ Performance Optimization & Debugging
- 

### EDUCATION

**Bachelor of Engineering (B.E.) – Computer Science & Engineering**

Graduated: 2022

---

### CERTIFICATION

- Certification in Web Development workshop
- Completed certification course in Python Programming Language, CCIT
- Completed certification course in Java Full Stack Development, ExcelR

## TECHNICAL SKILLS

**Frontend:** React.js, Angular, Redux, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Design

**Backend (Exposure):** Spring Boot, Django, Flask, REST APIs

**Database:** MySQL

**UI/UX Tools:** Figma, Wireframing & Prototyping

---

## PROFESSIONAL EXPERIENCE

### HCL Technologies – Pune

**Frontend Developer | July 2022 – Present (4 Years)**

#### Key Roles & Responsibilities:

- Designed and developed **responsive, cross-browser, and mobile-first UI components** using React.js and Angular.
  - Translated **Figma wireframes and design prototypes** into functional, pixel-perfect interfaces.
  - Integrated **REST APIs with frontend applications** to display dynamic data and enhance interactivity.
  - Implemented **state management solutions (Redux/Context API)** for scalable applications.
  - Optimized UI performance through **lazy loading, code splitting, and reusable components**.
  - Conducted **unit testing, debugging, and bug-fixing** to improve code quality and reduce production issues.
  - Collaborated with cross-functional teams in an **Agile environment**, contributing to sprint planning, code reviews, and daily stand-ups.
  - Assisted in backend integration by working with **Spring Boot, Flask, and Django APIs**, and supported database operations with SQL.
- 

## PROJECTS (Client-Facing Work)

### 1. MedicoCare – Healthcare Appointment System

**Client:** CarePulse Health Systems, USA

**Tech Stack:** Flask, HTML5, CSS3, JavaScript, MySQL

- Developed a **responsive healthcare portal** for patient registration, doctor listings, and appointment booking.
  - Built **intuitive UI screens** and integrated them with Flask backend and MySQL database.
  - Implemented **form validations, CRUD operations, and secure authentication**.
  - Optimized performance for **faster load times and cross-device compatibility**.
- 

## 2. ShopSphere – E-Commerce Product Dashboard

**Client:** TruView Retail Solutions, USA

**Tech Stack:** React.js, REST APIs, Node.js, MySQL, Figma

- Created an **interactive e-commerce platform** for product browsing, cart management, and order processing.
  - Converted **Figma UI/UX designs into reusable React.js components** with responsive layouts.
  - Integrated REST APIs and **implemented Redux state management** for real-time data handling.
  - Enhanced **app scalability and speed** with lazy loading and optimized rendering.
- 

## 3. WorkForcePro – Employee Management Portal

**Client:** BrightPath Consulting, USA

**Tech Stack:** Angular, Spring Boot, MySQL, Bootstrap

- Designed and developed **HR portal UI** to manage employees, departments, and performance reviews.
- Integrated **Spring Boot REST APIs** with Angular frontend for CRUD operations.
- Created **SQL queries for reporting and workforce analytics**.
- Added **role-based access control (RBAC)** for secure data handling.
- Improved UI/UX by **incorporating stakeholder feedback** and ensuring responsive design.
